Digital first – for a Digital renewal of the Swedish Public Sector 2015-2018

4 October 2016

Anneli Hagdahl

Division for e-Government, Ministry of Finance

Digitalisation is the most powerful force in our time

We are already there...

...but what about the public sector?

Foto: Oskar Kilbom/Folio

Objectives for digitalisation of the Swedish Public sector

Central government administration

- An innovative and interactive central government administration that is legally certain and efficient, has a high degree of quality, service and accessibility, and thereby contributes to Sweden's development and to an effective EU working process

ICT policy

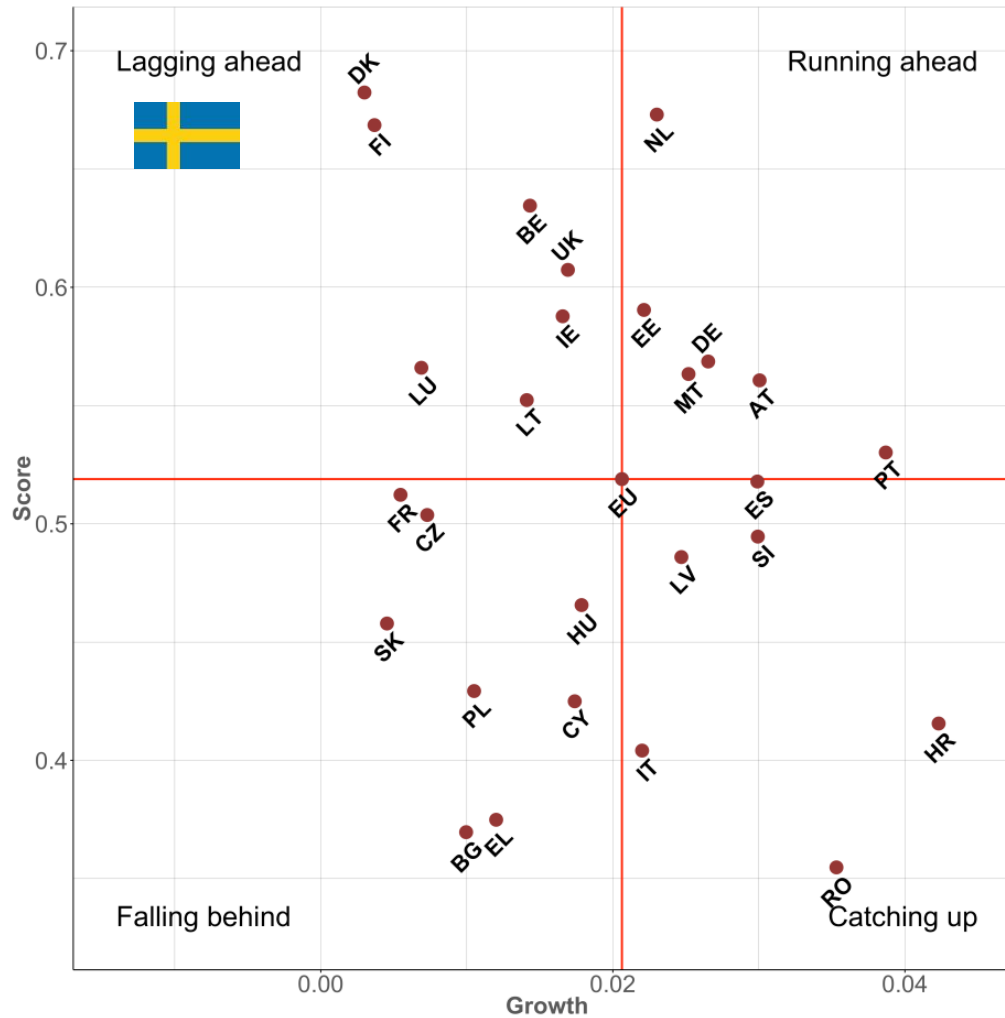

- Sweden to be the best in the world at exploiting the opportunities afforded by digitalisation

Digital Government policy

- a simpler day-to-day life for citizens;
- a more transparent administration that supports innovation and participation;
- enhanced quality and efficiency in government activities.

Digital first

- All central government agencies should primarily target digital channels to citizens and companies in their service delivery
